Message from the CEO

Maciej Jakimiec
Chief Executive Officer
Device Europe

Dear Stakeholders,

2023 has been an extraordinary year for Device Europe - a year of renewal, resilience, and redefinition. On July 10th, 2023, we celebrated a pivotal moment in our history: Device Europe's return to the Founder as we were proudly reclaimed back from Sims Lifecycle Services. This milestone represents more than just a change in ownership; it signifies our commitment to building a future that reflects our values, vision, and ambitions.

This moment of transformation has re-energized our team, sharpened our focus, and strengthened our resolve to deliver excellence. We stand as a dynamic and agile organization, ready to take on the challenges of a rapidly changing world while upholding our commitment to sustainability, innovation, and partnership.

The journey to independence has been both inspiring and challenging, but it has reinforced our belief in the importance of a clear purpose and a united team.

Device Europe is back - and we are more determined than ever to drive impactful change in the ITAD industry.

As we look ahead, our focus is on scaling

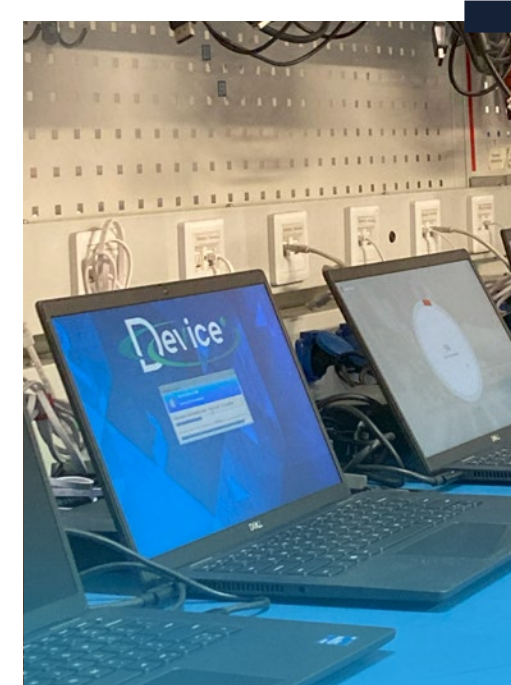

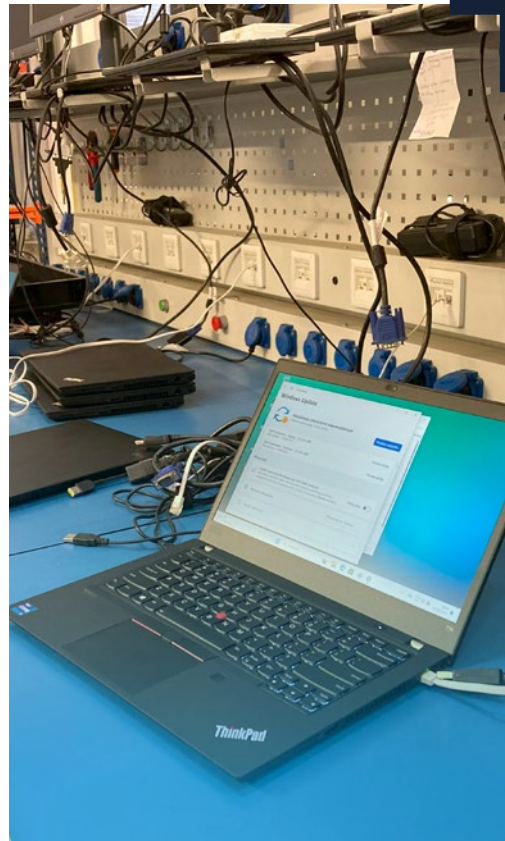

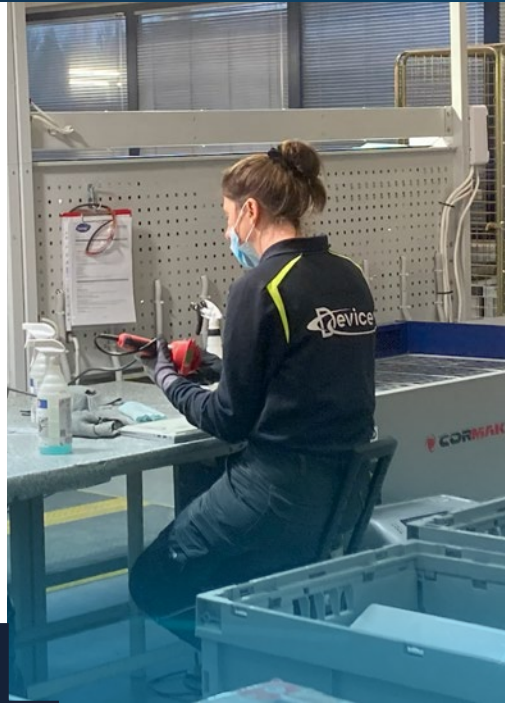

our impact, deepening relationships with our partners, and leveraging innovation to achieve sustainable growth. We remain dedicated to creating a circular economy where technology serves both people and the planet.

To our employees, partners, and clients - thank you for your support and belief in us during this transformative year. Your trust has been instrumental in making 2023 a landmark year for Device Europe. Together, we will continue to shape a future defined by innovation, sustainability, and shared success.

2023 Highlights

- Successfully transitioned to independence, ensuring seamless operations and retaining the trust of our clients and partners.
- Strengthened our sustainability initiatives, processing more than 40 000 devices and reducing environmental impact by 402,28 tCO₂e.
- Introduced new strategies to enhance our services, creating value for stakeholders while staying true to our mission.

Building a greener future starts here at Device Europe

Company History and Overview

At Device Europe, we have been at the forefront of IT asset management for over **30 years**, ensuring organizations can extend the lifecycle of their technology while reducing environmental impact. Our mission is rooted in providing innovative, secure, and sustainable solutions that prioritize both operational efficiency and the planet's wellbeing. By promoting the reuse, refurbishment, and recycling of IT assets, we actively contribute to the global shift toward a circular economy.

Efficiency and Responsibility

Whether we are managing decommissioned servers, repurposing desktop fleets, or supporting organizations in transitioning to new infrastructure, we prioritize the most efficient and environmentally responsible methods. Through our unwavering commitment to compliance, quality assurance, and continuous improvement, we aim to redefine IT asset management. At the heart of our approach lies a vision where operational excellence, data security, and sustainability work hand in hand to build a better digital future.

Commitment to the Environment

Our dedication to protecting the environment and reducing e-waste drives us to create solutions that not only extend the usability of IT equipment but also support the long-term goals of our clients and the communities we serve. By combining innovation with responsibility, we continue to lead the way in shaping a more sustainable and secure IT landscape.

What is Device Europe

Trustworthy

Device is a trustworthy industrial partner for all our customers. With our compliance to major international standards, we help our customers to optimize their IT investment and take care of their environmental impact.

Respectful

For Device Europe respect means that we carefully listen to our customers and try to meet all their demands. We are only satisfied if our customers are fully satisfied.

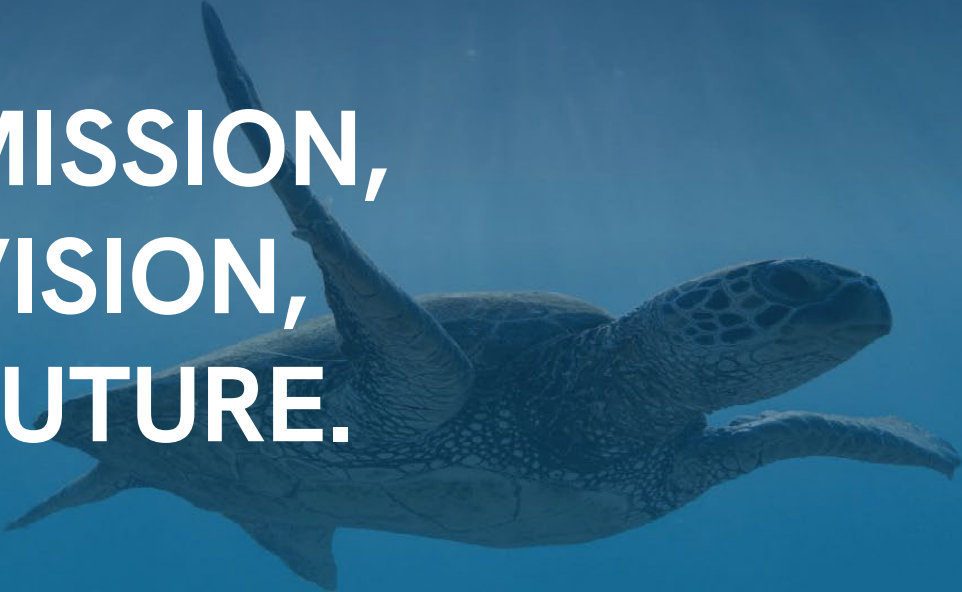

Circular

Nowadays circularity is a major topic in all industries and especially IT. Due to the growing IT demand the environmental impact is growing. With a well-defined circular approach, we can minimize the impact.

Our history

OUR MISSION, OUR VISION, OUR FUTURE.

At **Device Europe**, our core purpose and aspirations are deeply rooted in our Mission and Vision, which serve as the foundation for every decision we make and every innovation we pursue. We are committed to reshaping the IT asset management industry by prioritizing sustainability, security, and technological expertise. Through these principles, we empower organizations to handle their IT assets responsibly, ensuring optimal use while minimizing environmental impact.

Our forward-thinking approach not only enables us to remain a trusted partner for businesses across various industries but also helps drive their success in creating a more sustainable and efficient future. By integrating cutting-edge solutions with environmentally conscious practices, we ensure that businesses thrive while meeting their operational and environmental goals.

Our mission defines how we act today, guiding our strategies and fostering innovation, while our vision lights the way to a better tomorrow - one where businesses, technology, and the planet coexist harmoniously. Discover how Device Europe is shaping the future of IT asset management and why our Mission and Vision are at the heart of everything we do.

WE GRANT INFINITE LIFE TO YOUR IT EQUIPMENT

Mission

At **Device Europe** our mission is to revolutionize IT Asset Disposition (ITAD) by delivering secure, sustainable, and cost-effective solutions that empower businesses to responsibly manage their technology assets.

We are committed to safeguarding data, minimizing electronic waste, and enabling our clients to achieve their environmental and operational goals. Through our expertise, innovation, and dedication, we strive to be the trusted partner that empowers organizations to embrace the future with confidence.

Vision

Our vision is to lead the ITAD industry as a global force for positive change. We envision a world where technology is managed responsibly and sustainably, where data is protected with unwavering dedication, and where businesses thrive with the support of IT asset management that maximizes value while minimizing environmental impact.

By staying at the forefront of technology and sustainability, we aim to create a brighter, more secure, and more sustainable future for our clients, our industry, and the planet.

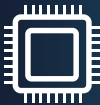

Company services

We provide tailored solutions to manage IT assets throughout their entire lifecycle, combining efficiency, security, and sustainability. Our services help organizations maximize the value of retired equipment through buyback programs and unlock additional revenue streams with trusted remarketing and resale channels.

To extend the lifespan of IT devices, we offer expert repair and cost-effective maintenance, ensuring optimal performance while reducing unnecessary replacements. For end-of-life equipment, our compliant recycling practices minimize environmental impact by responsibly recovering valuable materials.

Security is at the core of our approach, with certified data destruction processes that safeguard sensitive information and meet stringent compliance standards. With a global reach, our IT asset disposition services are designed to manage assets securely and effectively, no matter where your operations are located.

Each service contributes to a sustainable IT lifecycle, ensuring efficiency, cost-effectiveness, and environmental responsibility.

	Hardware Buyback program	Maximize the value of the retired IT assets with our efficient and sustainable buyback solutions.
	Global ITAD Services	Comprehensive IT asset disposition services designed to securely manage the IT lifecycle anywhere in the world.
	Repair & Third-Party Maintenance	Extend the lifespan of the IT devices with expert repairs and cost-effective maintenance solutions.
	Secure Data Destruction	Ensure complete data security with certified destruction processes tailored to organizational needs.
	End-of-Life Recycling	Dispose of obsolete IT equipment responsibly, minimizing environmental impact through compliant recycling practices.
	Remarketing & Sales	Unlock the hidden value of the IT assets through trusted remarketing and resale channels.

ENVIRONMENT

Reducing footprints, one IT asset
at a time.

GHG Emissions breakdown in 2023

Initiating Carbon Footprint Measurement

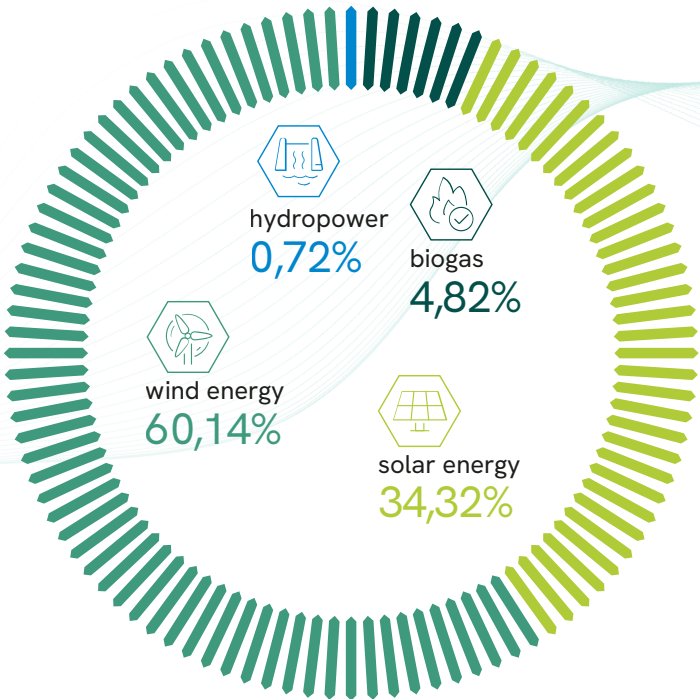

In 2023, we took a significant step forward in our commitment to sustainability by initiating the process of measuring the carbon footprint of our operations. This marks a crucial milestone in our journey toward understanding and minimizing our environmental impact. By identifying the key areas contributing to our emissions, we aim to implement effective strategies to reduce our carbon footprint and align our practices with global sustainability goals.

Scope	Total (tCO ₂ e)
1 Natural Gas	53,79
1 Liquid Fuel	20,02
2 Electricity	0 (renewable)
3 Staff Commuting	27,87
3 Hotel Stay	2,29
3 Business traveling	2,12
3 Upstream transportation and distribution	12,23
3 Downstream transportation	4,55
Total	122,87

Scope 2 Emissions

Our Scope 2 electricity emissions for 2023 are 56,92 tCO₂e based on the location-based method. However, using the market-based method, our emissions are zero, as our energy supplier, Respect Energy S.A., provides us with 100% renewable energy.

According to the 2023 energy structure report, the electricity we purchase comes entirely from renewable sources, including wind power (60,14%), solar energy (34,32%), biogas (4,82%), and small hydroelectric plants (0,72%). As a result, our energy

Source: Respect Energy

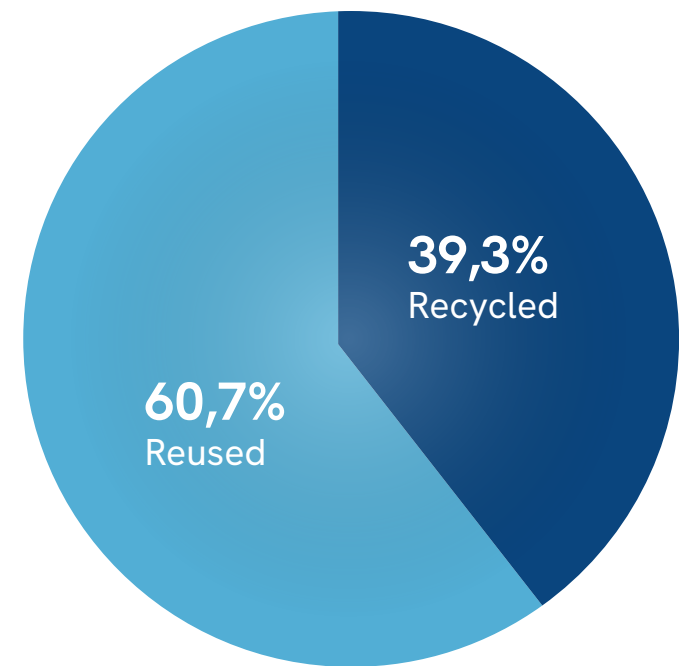

consumption does not contribute to carbon emissions, reinforcing our commitment to sustainability.

This achievement highlights the proactive steps we are taking to minimize our environmental footprint. By sourcing green energy, we demonstrate that reducing emissions is not only possible but also fully aligned with our vision for a sustainable future.

CO₂e we saved

Impacting the planet, one ton at a time

Our ITAD services are designed to support the circular economy. Together with our customers and partners, we significantly reduce CO₂e emissions each year by sustainably processing IT assets.

Reused items

Class	Reused QTY	Saved tCO ₂ e
Notebooks	9 482	96,40
PC	1 754	99,07
Screen	1 538	69,49
Networking	9 294	73,27
Mobility	1 649	7,27
Others	7 931	56,78
Total	31 648	402,28

Recycled items

Class	Recycled QTY	Weight (t)
Notebooks	3 487	6,28
PC	377	3,77
Screen	738	5,90
Mobility	809	0,63
Networking	615	3,21
Others	3 301	14,56
Total	9 327	34,35

It's like:

- 74 flights** around the Earth
A distance sufficient to reach the Moon and back 4 times (average distance: ~384 400 km).
- Circling the Earth **84 times**
Driving 3 352 333 km in a passenger car. The average emissions of a car are around 120 g CO₂e per kilometer.
- This amount of CO₂e could be absorbed by **18 285 trees** in a year.
A single tree absorbs around 22 kg CO₂e per year.

Excellence in 2024

EcoVadis Certification: Committing to sustainable

In 2024, our key goal is to achieve EcoVadis certification, a global standard for assessing corporate sustainability across environmental practices, labor rights, ethics, and sustainable procurement. This certification offers a clear measure of our sustainability performance and commitment to responsible business practices.

Scope of EcoVadis Assessment

- ✓ Environmental practices
- ✓ Labor and human rights
- ✓ Business ethics
- ✓ Sustainable procurement

Achieving EcoVadis certification aligns with our mission to operate as a responsible, forward-thinking company. We believe that transparency, environmental stewardship, and ethical business practices are essential to creating long-term value for our clients, partners, and the planet. By meeting the rigorous EcoVadis standards, we aim to reinforce our dedication to sustainable operations and demonstrate our commitment to making a positive impact on society and the environment.

Pursuing EcoVadis certification is a natural extension of our values and will serve as a powerful testament to our progress in implementing sustainable practices across all aspects of our operations. This certification will not only validate our current efforts but also inspire us to continually improve, setting an example of sustainability in the IT hardware and services industry.

Sustainable Packaging: Our 2024 Goal for Eco-Friendly Solutions

In 2024, we aim to reduce environmental impact by replacing current packaging materials with cartons made from recycled materials. This will help minimize waste, reduce the use of virgin resources, and align with our sustainability goals while maintaining product protection.

Reducing Energy Consumption in 2024

In 2024, we aim to reduce energy consumption in our company to support sustainability and lower our carbon footprint. This initiative aligns with our commitment to environmental responsibility.

We will achieve this by installing an EV charger to encourage green transportation and reduce emissions.

Additionally, we are switching to LED lighting to cut energy use by up to 70%, lower costs, and improve efficiency.

COMMUNITY

Building a thriving workplace
community together

Workplace safety

Mandatory
health & safety training

100%

of our employees

are undergo health and safety training before starting their roles. This mandatory training ensures that every team member is fully prepared to work in a safe and responsible manner from day one.

Why is this training essential?

Workplace Safety: It equips employees with the knowledge to identify potential risks and prevent accidents, creating a safer work environment for everyone.

Regulatory Compliance: The training ensures compliance with legal and organizational health and safety standards.

Confidence and Preparedness: By understanding workplace safety protocols, employees can perform their tasks more confidently and effectively.

Prevention of Hazards: Proper training minimizes the likelihood of injuries and incidents, protecting both employees and the company.

This commitment to health and safety reflects our dedication to fostering a secure and supportive workplace for all.

Employee wellbeing

Private Medical Care with LuxMed

We prioritize the health and wellbeing of our employees, which is why we provide them with private medical care through LuxMed. This comprehensive healthcare package ensures that our team members can access high-quality medical services without long waiting times, giving them the ability to prioritize their health with ease.

Benefits of LuxMed Private Care:

Quick Access to Medical Services: Employees can schedule appointments with specialists without enduring the long queues often associated with public healthcare systems.

Wide Range of Specialists: From general practitioners to highly specialized doctors, LuxMed offers access to a broad network of medical professionals.

Convenience: With numerous clinics in various locations, employees can choose a facility that is most convenient for them.

Improved Wellbeing: Knowing that medical assistance is readily available fosters a sense of security and allows employees to focus on their personal and professional goals without unnecessary stress.

This solution reflects our commitment to supporting our employees' physical and mental health, ensuring they feel valued and cared for. We believe that healthy and happy employees are the foundation of our company's success.

Creating memories beyond work because our team deserves the best

Kayaking trip

Our team had a fantastic two-day trip to the stunning Tuchola Forest. One of the highlights was a scenic kayaking adventure, allowing us to enjoy the peaceful rivers and connect with nature. During the day, we gathered around a campfire, enjoying the relaxed atmosphere. Later, we continued the fun with a lively dance party that brought everyone together. The trip was a wonderful mix of team bonding, outdoor activities, and great memories that we will cherish for a long time.

Sarbinowo

Our team enjoyed an unforgettable getaway in Sarbinowo, a charming seaside town with serene beaches and refreshing sea breezes. Days were spent relaxing at the pools or strolling along the sandy beach, soaking in breathtaking views and tranquility. Evenings featured a formal dinner and a lively dance party, filled with laughter, music, and great memories. This trip was the perfect mix of relaxation and bonding, leaving us refreshed and connected as a team.

Christmas Party

This year's Christmas party was a perfect mix of festive cheer and team bonding. We started with an elegant dinner at Ogniem i Mieczem, enjoying delicious food in a warm, rustic setting filled with laughter and holiday spirit. The celebration continued at a bowling center, where friendly competition, dancing, and shared moments made the evening unforgettable. It was a night to celebrate our team and successes, leaving us grateful for one another and excited for the year ahead.

Giving back, because every gesture matters

Supporting Others Through the "Szlachetna Paczka" Initiative

This year, our company proudly joined the Szlachetna Paczka initiative, a program that unites people to support those in need. We chose to help Mr. Piotr from Koronowo, whose life was profoundly changed after a tragic accident resulting in the loss of both legs. His courage and determination inspired us to come together and offer meaningful support.

We addressed some of Mr. Piotr's most urgent needs by purchasing a new refrigerator and gas cylinder to improve his daily life. After discovering his old laptop was beyond repair essential for his communication and personal projects we replaced it with a new one.

Our employees also showed great generosity, contributing items such as non-perishable food, warm clothing, bedding, and cleaning supplies. The team worked together to carefully prepare these donations, ensuring they met his specific needs.

This experience reminded us of the power of unity and the impact we can make when we extend a helping hand. Participating in Szlachetna Paczka was a humbling and inspiring experience, reaffirming our commitment to kindness and community support.

Clean-Up Initiative: Caring for Our Local Environment

Armed with gloves, bags, and enthusiasm, we cleaned the park, collecting a concerning amount of waste, including hazardous items like fluorescent lightbulbs. This highlighted the critical need for responsible waste management to protect our planet.

The initiative was more than a clean-up it was a chance to actively contribute to our local environment. Seeing the park transformed into a cleaner, safer space filled us with pride and reinforced our commitment to sustainability.

We hope our efforts inspire others in the community to join in protecting our shared environment. Together, we can create a cleaner, greener future.

“

True kindness lies in the act of giving without the expectation of anything in return because even the smallest gesture can create a ripple of hope in someone's life.

Goal for 2024

Onboarding program

In 2024, we plan to implement a comprehensive onboarding program to support new employees as they transition into our organization. This program is designed to ensure a seamless integration into our company culture, processes, and expectations, setting the foundation for long-term success.

“
Empowering our people to succeed from day one.

Key objectives of the onboarding program:

**Accelerated Adaptation:**

Provide new hires with the tools, knowledge, and resources needed to quickly adapt to their roles and responsibilities.

**Strong Engagement:**

Foster a sense of belonging and connection to the company's mission, values, and team culture from the start.

**Skill Development:**

Introduce tailored training sessions that align with both individual roles and broader organizational goals.

**Efficient Workflows:**

Familiarize new employees with internal processes and systems to ensure they can contribute effectively and confidently.

**Enhanced Safety:**

Equip employees with the necessary safety training and protocols during onboarding to ensure they understand how to maintain a secure and risk-free work environment for themselves and their colleagues.

This onboarding initiative reflects our commitment to investing in our people, enabling them to thrive, contribute effectively, and prioritize safety within our organization.

GOVERNANCE

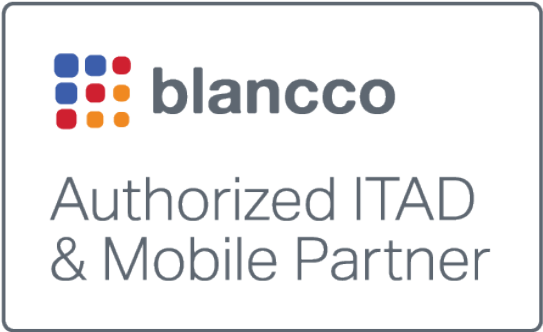

Leading with transparency,
responsibility, and trust

Data sanitization

Why We Chose Blancco

We chose Blancco for its trusted data security and reliability. Its solutions ensure secure IT asset management, compliance with global standards, and support for sustainability by enabling safe device reuse and reducing e-waste, aligning with our environmental goals and commitment to a circular economy.

Blancco: Leading the way in secure data erasure

Blancco, a leader in data erasure, provides software that securely and permanently removes data from digital devices. Compliant with standards like NIST, DoD, and GDPR, it ensures data cannot be recovered. Supporting various devices, Blancco also offers detailed reports to confirm regulatory compliance.

100%

secure data erasure guaranteed with Blancco

Physical Cleaning Process: Ensuring high standards of Device hygiene

Our physical cleaning process ensures that the devices we acquire from our partners are free from any external markings, such as stickers or labels, giving them a neutral and professional appearance. We use specialized cleaning products, including high-quality wipes and dedicated cleaning agents, to remove dust, fingerprints, and other contaminants. For stubborn residues, like adhesive labels, we apply extraction gasoline, which effectively dissolves glue without damaging the device’s surface. This meticulous approach guarantees that each device is thoroughly cleaned and ready for its next lifecycle.

To ensure a meticulous cleaning, we also rely on a powerful air

compressor, which allows us to remove dust and particles from hard-to-reach areas, such as keyboard crevices, ports, and vents. This method prevents the accumulation of debris that could impact the performance or appearance of the device.

In 2023, we introduced lint-free wipes into our cleaning process, significantly enhancing our ability to provide a dust-free and streak-free finish. These new wipes reduce the risk of leaving particles behind, ensuring that each device looks as professional and pristine as possible. This attention to detail reflects our commitment to delivering high-quality, like-new products to our clients, while adhering to sustainable and efficient cleaning practices.

Certifications: guaranteeing quality and compliance

All our ISO certifications are fully accredited, reflecting our dedication to excellence, sustainability, and safety in every aspect of our operations. These certifications demonstrate our commitment to globally recognized standards and continuous improvement.

We take pride in fostering trust among clients, partners, and stakeholders by upholding high standards that minimize risks and ensure consistent value. Our focus on sustainability and safety aligns with international benchmarks, driving innovation and safeguarding the well-being of all those we serve.

By integrating these certifications into our daily practices, we ensure that our processes remain efficient, secure, and environmentally responsible, setting the foundation for a resilient and sustainable future.

ISO 9001:2015 Quality Management System

We proudly hold the ISO 9001:2015 certification, reflecting our commitment to consistently delivering high-quality products and services. This certification ensures that our processes focus on customer satisfaction and continuous improvement.

ISO 45001:2018 Occupational Health and Safety Management System

ISO 45001:2018 underscores our proactive approach to workplace safety. This certification reflects our dedication to protecting the health and safety of our employees, clients, and partners by identifying and mitigating potential risks.

ISO 14001:2015 Environmental Management System

The ISO 14001:2015 certification demonstrates our dedication to environmental sustainability. We prioritize minimizing our environmental footprint, improving resource efficiency, and adopting responsible practices across all operations.

ISO/IEC 27001:2022 Information Security Management System

With ISO/IEC 27001:2022 certification, we showcase our commitment to safeguarding sensitive data and ensuring information security. This certification proves that our information security practices meet international standards.

Safety: a core value reflected in our actions

We are proud to report that, with the close of this year, we have now gone **627 days** without a workplace accident, approaching almost two years of incident-free operations. This achievement reflects our company's strong commitment to maintaining a safe and healthy working environment for all employees.

We continuously invest in training, equipment maintenance, and clear safety protocols to ensure everyone's well-being. By staying vigilant and attentive to potential hazards, we aim to prevent accidents before they occur.

Our ongoing efforts demonstrate that safety is not just a guideline on paper, but a fundamental value we consistently put into practice every day. As we step into the new year, we are confident that our unwavering dedication to safety will guide us toward even greater success in the future.

Strengthening Workforce Well-being and Operational Excellence Through Sustainable Safety Measures

As part of our ongoing commitment to Environmental, Social, and Governance (ESG) principles, we have implemented a series of proactive measures to enhance the safety, comfort, and productivity of our workforce. By investing in superior workwear, reliable ESD protection devices, and ergonomic, antistatic seating, we continue to advance our operations in a responsible and forward-thinking manner.

“Safety doesn’t happen by accident.”

Ensuring Proper ESD Protection in Repair Operations

To safeguard sensitive electronic components during inspection, troubleshooting, and repairs, we have installed a specialized wrist strap tester in our repair department. This device verifies the continuous grounding of each technician’s ESD wrist strap, preventing electrostatic discharge incidents. By proactively verifying the straps’ integrity, we help reduce component damage, enhance product reliability, and maintain a secure working atmosphere.

Enhancing ESD Safety and Ergonomics With Antistatic Chairs

Further strengthening our ESD protection protocols, we have introduced REECO S-10A antistatic chairs into our repair facilities. Designed to prevent the buildup of static electricity, these chairs protect components while promoting technician comfort. Their ergonomic construction supports better posture and reduces fatigue, ensuring a healthier, more efficient work environment. Integrating these chairs underscores our dedication to combining employee well-being with operational excellence.

By implementing these improvements, we demonstrate our unwavering focus on safety, sustainability, and the continuous betterment of our working conditions foundational principles guiding our organization’s future.

Enhancing safety and comfort through improved workwear

We have recently made a significant upgrade to our employees' work attire, moving from basic cotton T-shirts and vests to advanced, high-performance garments from suppliers like Mascot (Accelerate Safe, Unique) and CXS (ESD Nome). These choices provide elevated visibility, anti-static properties, and compliance with EN 17353 standards, ensuring safer conditions in various working environments.

This new workwear not only offers superior protection and durability but also improves comfort and overall employee satisfaction. The fabrics are breathable and robust, granting freedom of movement while reducing the risk of accidents and health issues associated with lower-quality materials. Additionally, the extended

lifespan of this clothing supports more efficient resource use and helps to minimize waste.

By making this conscious shift, we demonstrate our ongoing commitment to the well-being of our workforce and the responsible use of resources. In doing so, we foster a safer and more

productive working environment, reinforcing our position as a forward-thinking organization dedicated to continuous improvement.

Goal for 2024

Achieving R2v3 Certification for Electronics Recycling Excellence

We are excited about this journey and are actively working towards achieving **R2v3** certification. This reflects our commitment to excellence, environmental care, and the well-being of our partners and customers.

“
Empowering our people to succeed from day one.

While we are in the process of obtaining the R2v3 certification, it remains a top priority for us as we strive to meet the latest and most rigorous standards in electronics recycling. R2v3 is the latest and most rigorous version of the R2 (Responsible Recycling) Standard, recognized globally as a benchmark for best practices in the recycling and refurbishment of electronic devices. This certification focuses on ensuring safe, secure, and environmentally friendly management of used electronics throughout their lifecycle.

Achieving R2v3 certification will demonstrate our dedication to maintaining the highest standards in

data security, environmental stewardship, and workplace safety. It requires comprehensive systems and processes that minimize the environmental impact of electronic waste while prioritizing the responsible reuse of valuable components. The certification also emphasizes transparency and accountability, with strict criteria for documentation and reporting.

Our pursuit of R2v3 aligns with our mission to extend the life of electronic devices and promote a circular economy. By obtaining this certification, we aim to reinforce our commitment to sustainability, ensuring that our practices meet and exceed global standards for responsible IT asset management and electronic recycling.

Benefits of R2v3 Certification

-  Reduction of electronic waste
-  Improvement of data security
-  Extension of device lifecycle
-  Increased environmental responsibility

“
Sustainability is not a goal, it’s a responsibility.
